1. What is this product?

Type	Dutch law governed warrants
Term	The product does not have a fixed term, subject to exercise by the investor or termination by the issuer.
Objectives (Terms that appear in bold in this section are described in more detail in the table(s) below.)	<p>The product is designed to provide a return in the form of a cash payment following exercise by you or termination by us that will depend on the performance of the underlying. The product has no fixed term. The product may terminate at any time as described below. If, upon termination of the product, the underlying has risen to or above the knock-out level, the product will return less than your initial investment or even the minimum payment amount of EUR 0.001, which means you will effectively lose your initial investment.</p> <p>Leverage: The product offers leveraged exposure to the performance of the underlying. This means that the payment you receive following exercise by you or termination by us increases on a magnified basis as the performance of the underlying decreases, but you also bear a greater loss if the underlying performs positively.</p> <p>Automatic early termination: If the price of the underlying at any time during the term of the product is at or above the knock-out level, the product will terminate immediately and you will receive a cash amount equal to (A) (1) the current financing level minus (2) a price for the underlying based on the levels at which we are able to unwind our hedging positions immediately following any such event, multiplied by (B) the entitlement, and converted into EUR at the FX rate, subject to a minimum of EUR 0.001.</p> <p>Exercise by you or termination by us: You may exercise the product on certain dates and subject to the notice periods set out in the product terms (see "7. Other Relevant Information" below for more information on where you can obtain the product terms). We may also terminate the product on certain dates and subject to the notice periods set out in the product terms. The exercise or termination, as the case may be, will be effective after the period of time indicated in the product terms.</p> <p>If the product has not automatically terminated early, you will in both cases on the settlement date receive a cash amount equal to (1) (A) the current financing level on the valuation date minus (B) the reference price on such date multiplied by (2) the entitlement, and converted into EUR at the FX rate, subject to a minimum of EUR 0.001.</p> <p>Following the issuance of the product, the knock-out level and the current financing level will be adjusted for current market conditions and a fee. Updated information on the levels of such components will be available from the issuer and will be published on www.ingmarkets.de.</p> <p>Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.</p> <p>The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the underlying, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.</p>
